

SPAIN - a Holiday Paradise

Would you like it to be a paradise for wildlife too?

In our favourite holiday destination, Spain,
many animals are left without protection and rights.

The new animal protection law in Spain excludes many animals:

hunting dogs | service dogs | guiding dogs | guard dogs
therapy dogs | rescue dogs | pigeons + parakeets
fighting bulls | carriage horses | circus animals | zoo animals
feral cat colonies | so-called service and farm animals
sexual abuse of animals will once again be exempt from punishment

We say NO to this!

We demand a uniform European animal protection law

How can you help?

The tourism industry is a very big economic factor in Spain.

As tourists, our complaints against animal abuse have a big impact.
You can help the Spanish animal welfare activists and contribute to the
welfare of the animals if you call **112** when you:

- see a dog on a chain
- find an abused cat
- discover a dead or injured hunting dog in a ditch
- discover that a bullfight is taking place in an arena
- see carriage horses standing in the blazing sun
- notice any animal abuse

For you it's just a quick call during the most
beautiful weeks of the year,
but for the animals it means their survival.

Thank you for giving your voice
to voiceless animals.

May your holiday in Spain save an animal's life.
